AutoCAD [Updated]

Go to program's Options. You must enable the option "Use the Autodesk Autocad key to start the Autocad application". Run Autocad. Go to Autocad menu and open keygen.exe. Click on "make" or "open" to generate the Autocad key. Copy the key you generated into the same folder where Autocad.exe is located. Save the Autocad.ini file to any location you want. For example, create a folder to save it. If you use the other Autocad version, you must edit this file so the password you entered for the second Autocad version is not saved as the serial number in the file. 3. Step by Step instructions Running Autocad for the first time after activation 1. Go to the Autocad folder and open the Autocad.ini file. 2. Find this line: "ProgramData=C:\ProgramData" 3. Change "ProgramData" to a folder you want where Autocad will save its data. For example, you can create a folder for Autocad, and copy Autocad.ini file to this folder. 4. Save Autocad.ini file. 5. Go to C:\ProgramData\Autocad\ 6. Open Autocad keygen.exe. 7. Run Autocad. 8. Go to Autocad menu and open keygen.exe. 9. Click on "make" or "open" to generate the Autocad key. 10. Copy the key you generated into the same folder where Autocad.exe is located. 11. Save the Autocad.ini file to any location you want. For example, create a folder to save it. If you use the other Autocad version, you must edit this file so the password you entered for the second Autocad version is not saved as the serial number in the file. **Note:** You can save the Autocad.ini file into any location you want and call it by any name. The Autocad version that you are using does not matter. Running Autocad the second time after activation 1. Go to the Autocad folder and open the Autocad.

What's New In AutoCAD?

New Markup Assist feature: Create and manage your own markers for use in markup-enabled applications. (video: 1:55 min.) The updated Autodesk License Terms and Conditions: New changes to existing license terms and conditions such as "Online Service" (video: 1:54 min.)
